

ORI COHEN

Product Design Team Lead

oricohenw@gmail.com · [054-3383953](tel:054-3383953) · [Portfolio](#) · [LinkedIn](#)

SUMMARY

Product Design Team Lead with 5+ years building enterprise SaaS products end-to-end - from discovery to pixel-perfect delivery. Leads a team of 4 designers at Verint and built LUX 2.0, Verint's design system, from scratch - now running across 40+ products used by 10,000+ customers worldwide, with a zero-terminal Figma-to-Storybook pipeline that ships design changes to production in under 60 seconds. Works daily with Claude and AI-assisted workflows to build internal Figma plugins and automation that remove manual steps from the design-to-code pipeline. Focused on where product design meets AI: building internal tools, automation pipelines, and design-to-code systems that let teams move at outsized speed.

CORE SKILLS

Product Discovery & Strategy · Design Systems & Design Tokens · Figma-to-Storybook Pipelines · Mobile UX · Accessibility (WCAG 2.2 AA) · Motion Design · Team Leadership & Mentorship · AI-Augmented Workflows (Claude, LLM-assisted prototyping & automation)

Tools: Figma, Framer, Cursor, Storybook, Claude, GitHub, Monday, Illustrator, After Effects, Premiere Pro, HTML/CSS

EXPERIENCE

Product Design Team Lead | Verint *(Aug 2024 – Present · Tel Aviv)*

- Lead a team of 4 product designers - mentorship, design reviews, and cross-functional alignment with PMs and engineering.
- Architected LUX 2.0, Verint's design system, from scratch: a 3-layer, 1,550-token architecture (primitives → semantics → component), full light/dark theming, and WCAG AA accessibility - now running across 40+ Verint products used by 10,000+ customers.
- Designed and shipped a zero-terminal Figma-to-Storybook pipeline: editing a Figma variable and one click in a custom-built plugin (Token Sync) triggers TypeScript generation, an automated GitHub pull request, GitHub Actions validation, and a live Storybook rebuild - end to end, with no developer needed for token changes.
- Own the mobile UX domain: defined interaction patterns and accessibility standards used across 3 mobile products/flows; shipped a Lottie-based Motion Library with animation tokens built into the system.
- Use Claude and AI-assisted workflows daily to build internal design tooling: built and published Figma plugins, each removing a manual step from the design workflow.

Experienced Product Designer | Verint *(Feb 2022 – Aug 2024 · Tel Aviv)*

- Designed end-to-end features for Verint's enterprise SaaS platform, progressing from individual contributor to senior designer over 2.5 years.
- Led user research and interviews that directly informed feature prioritization with PMs.
- Partnered with PMs and engineers in agile sprints from discovery through delivery, with a consistent focus on accessibility and interaction quality.

UX/UI Designer | Ori Mintz Media *(Nov 2020 – Jan 2022)*

- Designed and built 20+ client websites end-to-end: discovery, UX research, prototyping, development, and QA.
- Owned all motion and animation output - Lottie animations, GIFs, promotional videos, and animated social content.

Security Specialist | Office of the Prime Minister of Israel *(Jan 2017 – Oct 2020)*

- Classified role requiring high-level security clearance, discretion, and close attention to detail.

EDUCATION

Google UX Design Professional Certificate - Coursera & Google, 2022

Graphic Design & UI/UX - HackerU, 2020

MILITARY SERVICE

Squad Commander & Platoon Commander - Golani Infantry Brigade, IDF · 2013–2016

Led combat units through Operation Protective Edge; awarded the Protective Edge Medal and Independence Day Excellence Award.
